*Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 19-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Basile et al.

Basile et al discloses a method and apparatus for transmission and reception of the multicarrier digital television signal (Fig. 4, 5) comprising the following claimed limitations: “a trellis encoder” (312), “an interleaver” (314), “a modulator” (316 to 30), “demodulator” (50), “de-interleaver” (432), “trellis decoder” (434), “video decoder” (Fig. 1, 70), “display” (Fig. 1). Basile et al differs from the claimed invention in that Basile et al’s modulator performs QAM modulation, rather than VSB modulation. Nonetheless, Basile et al further teach that “other modulation methods can also be used” (col. 6, lines 1-2). Moreover, using VSB modulation in television transmission system is known in the art at the time of the invention. It would have been obvious to one of ordinary skill in the art at the time of the invention to implement Basile et

al's teachings using other modulation methods, including VSB modulation, when it is advantageous to use VSB modulation for a particular design.

***Conclusion***

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
